Trujillo, Perú | +51 980229672

Software Engineer with 4+ years of experience building scalable end-to-end systems, from component to cloud deployment. I led the architecture of ERP and geospatial platforms in the agro-industrial sector, directing their migration to AWS and automating workflows that reduced manual errors by 30%. Specialized in the Python (Django) and Vue.js ecosystem, with a solid DevOps culture: infrastructure as code, CI/CD pipelines, and integrated security practices.

PROFESSIONAL EXPERIENCE

Agrovision Corp.

Chiclayo, Perú

Programmer analyst

Ago 2022 – Ago 2025

- I led the design, architecture, and deployment of PCG-AGRO (Agricultural ERP) and Harvest (Geospatial Monitoring), directing the infrastructure migration to AWS and Hostman to optimize scalability and costs. I developed RESTful APIs with Django and PostgreSQL, as well as advanced interfaces in Vue 3 with Handsontable for handling large volumes of agricultural data, automating validation workflows that reduced manual errors by 30%. I built ETL pipelines with Pandas and Matillion to consolidate heterogeneous data sources, and led technical mentoring and code reviews, establishing modular architecture standards within the team.

Agrovision Corp.

Chiclayo, Perú

Programming Assistant

Oct 2021 – Jul 2022

- I led the database migration from local servers to AWS, executing data cleaning and normalization to ensure its integrity in the cloud. I designed the relational database schema with the Django ORM, prioritizing modularity and efficiency in SQL queries. I introduced Docker into the workflow, achieving full system containerization to standardize development, testing, and production environments, and I developed ETL processes and scheduled tasks (Crons) to automate data ingestion. I established the use of Git and Bitbucket in the team for the first time, improving collaboration and code traceability.

Prosegur S. A

Trujillo, Perú

Administrative Assistant

May 2018 – Oct 2019

- I supported the audit and control of large volumes of data, ensuring their accuracy. I collaborated on the preparation of reports and tracking of KPIs for the team. I provided basic technical support, resolving IT incidents and assisting users in their day-to-day operations.

EDUCATION

National University of Trujillo

Computer Engineering

Trujillo, Perú

2012 – 2017

CERTIFICATIONS

DevOps Diploma Program

Mundos E - National University of Córdoba

Online

Sep 2025 – In progress

DevOps Engineer

DMC Institute

Online

Sep 2025 – Feb 2026

Python for Data Science

Social Data Consulting S.A.C.

Online

Mar 2021 – May 2021

Introduction to Programming with Python

Austral University (Coursera)

Online

Jul 2020 – Jul 2020

TECHNICAL SKILLS

▪ DevOps, Cloud & Security

- **Cloud Platforms:** AWS, Azure, Google Cloud Platform (GCP), Hostman.
- **Infrastructure as Code (IaC):** Terraform, Terraform Cloud (remote state, VCS workflow).
- **Containerization:** Docker, Docker Compose, Nginx, Unicorn.
- **CI/CD & Automation:** GitHub Actions, Bitbucket Pipelines, Bash Scripting.
- **DevSecOps:** Snyk (SCA & container scanning), SonarCloud (static analysis, Quality Gates), OIDC (keyless auth), AWS SSM (SSH-less deploy, Port Forwarding), Cloudflare Turnstile.
- **Observability:** Prometheus, Grafana, Node Exporter, cAdvisor.
- **OS & Servers:** Linux Server Management.

▪ Backend Development

- **Languages:** Python (Advanced), JavaScript (ES6+), TypeScript.
- **Frameworks:** Django, Django REST Framework (DRF), Node.js, Serverless Framework (AWS Lambda).
- **API Design:** REST APIs, WebSocket, Webhooks, OData, Zod (schema validation), API Gateway (rate limiting).

▪ Frontend Development

- **Frameworks:** Vue.js 3 (Composition API), Nuxt.js 3 (SSR/SSG), Vite.
- **Styling:** Tailwind CSS.
- **Testing:** Vitest (Unit testing, Coverage).
- **Ecosystem:** Vue Router, Vue I18n (Internationalization), pnpm.
- **Libraries:** Pandas, Handsontable (Advanced data grid), MJML (email framework)

▪ Databases

- **Relational:** PostgreSQL (Advanced SQL), Microsoft SQL Server, MariaDB.
- **NoSQL:** MongoDB, DynamoDB
- **Analytics:** Google BigQuery

▪ Methodologies & Practices

- **Version control:** Git (GitFlow), GitHub, GitLab, Bitbucket.
- **Culture:** DevOps / DevSecOps Mindset, Agile / Scrum.
- **Software Design:** Clean Code, SOLID, DRY, Modular Architecture
